

This is regarding the Video Relay Services, it is strongly recommended that this services to be maintained for the people in the nation. It is an essential tool for me to use, because it is in the technology that enables my family to communicate. My mother in law does not have adequate English ability, ever since VRS started, she was able to communicate with many various businesses, doctor's offices, and several other places, and be able to relay her thoughts and feelings across without scrambling with words in English. I find VRS, for myself, very, very beneficial, and I enjoy using VRS, because it allows me to use my first language, American Sign Language. Please consider this as a plead for our right to communicate in our own language across the nation, through Video Relay Services. Thank you.
